

CREATIVE ASSIGNMENT · AI MISSION

Smart Campus 2030

Use all six branches of AI to design a smarter University of South Asia

Course	Artificial Intelligence (CSC-3602)	Assignment No.	01
Instructor	Mr. Muhammad Waqas Ishaq	Total Marks	5
Type	Individual (handwritten work)	Due Date	10th Oct 2026
Name / Roll No.	_____	CLOs	CLO-1, 3, 4

Mission: You are an AI consultant for the Vice Chancellor. Design a Smart Campus with ONE feature for each AI branch.

System name: _____ **Tagline:** _____

TASK 1 Six Branches, Six Features [3 marks]

One original feature per branch (0.5 marks each). Hints are just examples — don't copy them.

Branch	Your smart feature (name)	How it works (one line)
Machine Learning <i>e.g., predict who needs help</i>		
Natural Language Processing <i>e.g., admission chatbot</i>		
Computer Vision <i>e.g., gate / parking camera</i>		
Robotics <i>e.g., book-carrying robot</i>		
Expert Systems <i>e.g., course advisor</i>		
Fuzzy Logic <i>e.g., smart AC / lights</i>		

University of South Asia

TASK 2 Best Feature: PEAS [1 mark]

Your best feature: _____ — fill its PEAS in one short line each.

Performance	
Environment	
Actuators	
Sensors	

TASK 3 One Risk, One Fix [0.5 mark]

For any ONE feature: write one risk (e.g., privacy, bias, mistakes) and how to reduce it.

Risk	
Fix	

Rules: This is a HANDWRITTEN assignment — write neatly with a pen inside the boxes. Work individually; ideas must be your own (creativity & neatness carry 0.5 mark). AI tools may be used for brainstorming only — declare: _____. Submit your handwritten sheet (hard copy in class or a clear photo/scan on Google Classroom) by the due date.
